
Today I'm going to explain how to download and install .NET Framework 3.5 offline installer, which includes .NET Framework 2.0 and 3.0 and is useful if your computer is without the internet or you needed a lightweight installation of the framework on your USB flash drive or removable disks. It's quite simple actually, all you need to do is: -1 Get a copy of .NET Framework 3.5 offline installer -2 Put it on USB Flash Drive -3 Use the install binary on USB Flash Drive to install .NET Framework 3.5 on Windows 7/Vista/XP/2000 computers

How To Download And Install .NET Framework 3.5 Offline Installer?

First you need to download the .NET Framework 3.5 offline installer from Microsoft . You can get it [here](#) or follow the link below:

.Net Framework 3.5 Offline Installer (386MB) / [Mirror 1](#) / [Mirror 2](#) / [Mirror 3](#) / [Mirror 4](#) / [Mirror 5](#)

Extract the downloaded file, all three files will be in separate directories, one for each of them. Place them on a Desktop USB Flash Drive, you will need a fast one. Don't run the downloaded file, it's going to perform an installation of .NET Framework 3.5, don't worry though because it will not install the .NET Framework 2.0 and 3.0 which is included in the same 1 package. You can also try to use Windows System Restore if you think you might have problems with your system after downloading and installing the offline installer. To use this function all you need to do is open 'System Protection Center' and click: "Start" > "Restore my computer". On the next page click: "Next". You will see the following screen: On this screen, click: "Browse" and pick the restore point you wish to use. Click "Next >" to follow the on-screen instructions on how to restore your computer.

How To Use .NET Framework 3.5 Offline Installer To Install On A Windows Computer?

After downloading all three files of .NET Framework 3.5 (including .NET Framework 2.0 and 3.0) simply copy all three files on a USB Flash Drive (or anywhere else like an external disk) and then plug that into your Windows XP/7/Vista/2000 computer where you wish to install.

After plugging in the USB Flash Drive, turn your computer on and wait until Windows detect the Generic volume on your computer. After that you will see this screen: Click: "Next" and you will see this second screen: This screen asks if you want to perform an installation of .NET Framework 3.5 with the setup.exe file or if you want to extract components separately using extract.exe files which are located in the .NET Framework 3.5 sub-folder (for example sub-folder DEU). Click "" to install .NET Framework 3.
